Size
2,900 SF

Completion Date
2008

Key Staff
Jack Murchie, Project Manager
Molly Kinsella, Project Architect

This Project is a three part ensemble of a renovated summer house and a garage with bunkroom above. The project is organized by common roof slopes, wall and roof materials, a swimming pool, courtyards, and a cross axis marked by blue doors and blue polycarbonate canopies. The metal clad volumes orient to a recreational area containing activities for swimming, fire watching, swinging and volleyball. Entry is from the street, between the garage and house volumes, and under a bridge. The landscape is a Lake Michigan beach installation and the pool is part hot tub, lap pool, and rafting rapids. The blue and white mosaic tile walls define these pool areas.
